

**EU Declaration of Conformity
Regarding the POP Regulation (EU) 2019/1021**

Regulation (EU) 2019/1021 (POP Regulation) transposes the Stockholm Convention on Persistent Organic Pollutants (POPs) into European law (POP $\triangleq$ Persistent Organic Pollutants). This regulation prohibits or restricts the production, use, import, and export of POPs.

We hereby declare that Lorenz Messtechnik GmbH does not manufacture any persistent organic pollutants. We have required our suppliers to comply with legal requirements and maintain constant contact with them to ensure that our products comply with the substance bans and restrictions set forth in the POP Regulation. Changes to the POP Regulation, including its annexes and, in particular, the lists of substances in Annexes I, II, and IV, are continuously monitored to ensure we can supply our customers with products of proven quality. The products manufactured, processed, and distributed by Lorenz Messtechnik GmbH do not contain any persistent organic pollutants as defined by the current POP Regulation (EU) 2019/1021.

Lorenz Messtechnik GmbH has not verified the suppliers' corresponding statements through laboratory analyses.

This declaration is in exclusive responsibility of the manufacturer

**Lorenz Messtechnik GmbH
Obere Schlossstrasse 131
